

Human Services Department/Community Services Division (HSD/CSD) - Vianney Villas Weatherization Project

The HSD/CSD, in partnership with the Foundation for Senior Living, initiated Arizona's largest multi-family, low-income weatherization project in February of 2002. The project reduced energy costs and provided comfort and safety for 50 low-income older adult households in the Vianney Villas, Section 8 housing complex in the City of Avondale. The estimated energy savings per unit per year exceeded \$193. The project was a unique, collaborative effort spearheaded by county government with financial support from Southwest Gas, Arizona Public Service, the Arizona Department of Commerce Energy Office and in-kind support from the city of Avondale.
